

V.O.I. Certificate of Sterilization (CofS)

Note: OSHA Standards (29CFR1910.1030) require instruments to be sterilized prior to shipping.

OSHA Bloodborne Pathogens Standard (29CFR1910.1030) requires the use of appropriate sterilization on potentially contaminated equipment and instrumentation prior to transporting. This is necessary to ensure that equipment is in a condition that makes it safe to be handled by all personnel who may come into contact with it during transit and subsequent handling. All used surgical equipment is assumed to have potential exposure to blood or other potentially infectious materials.

Instructions:

1. _____ Please contact your account representative for an RMA# _____ prior to shipping.
2. _____ Sterilize using OSHA-approved protocols.
